Marlborough Multi Cap Income Fund Class P Shares

A Sub-fund of the Marlborough No2 OEIC (ISIN Income GB00B908BY75, Accumulation GB00B907VX32)

This Fund is managed by Marlborough Fund Managers Ltd

Objectives and Investment Policy

The aim of the Fund is to provide income, that is, money paid out from an investment as dividends from shares, as well as to deliver capital growth, that is to increase the value of your investment, over a minimum of 5 years. The Fund aims to deliver a greater income than the FTSE All-Share Index, over any 3 year period, however there is no certainty this this will be achieved

The Fund will invest at least 80% in the shares of companies and investment trusts listed on UK stock exchanges. This will include a range of small, medium and large companies, with a bias towards small and medium companies.

The Fund is actively managed, which means the manager decides which investments to buy and sell and when. Investments are selected based on individual company research.

The Fund invests in companies which the manager believes: • have the ability to increase their dividends and offer the potential for growth; or • companies which have previously paid steady dividends and are expected to continue to do so.

The Fund may also invest in companies which are listed on overseas stock exchanges, other securities which offer returns linked to the company performance, such as warrants, preference shares and convertible bonds,

unquoted companies and other funds.

The Fund will normally be fully invested save for an amount to enable ready settlement of liabilities (including redemption of shares) and efficient management of the Fund both generally and in relation to strategic objectives however may hold higher cash balances in extreme market conditions.

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors' as a way of dividing funds into broad groups with similar characteristics.

The Fund's investment policy puts it in the IA UK Equity Income sector. You may want to assess the Fund's performance compared to the performance of this sector.

The Marlborough Multi Cap Income Fund pays income. If you wish to receive this please tell us. If you do not want to receive income you will be given accumulation shares which means income is invested back into the Fund and reflected in the price of your shares.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 6 because its investments have experienced high volatility in the past. The Fund's volatility is affected by various risks, including:

- The Fund will be exposed to stock markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

- The Fund invests in smaller companies which are typically riskier than larger, more established companies. Difficulty in trading may arise, resulting in a negative

impact on your investment.

- The Fund invests mainly in the UK therefore investments will be vulnerable to sentiment in that market which may strongly affect the value of the Fund.

- In certain market conditions some assets may be less predictable than usual. This may make it harder to sell at a desired price and/or in a timely manner.

- In extreme market conditions redemptions in the underlying funds or the Fund itself may be deferred or suspended.

Risks which are not adequately captured by the risk indicator include:

- Dividends paid by companies are not guaranteed and can be cancelled, which may impact the Fund's ability to deliver an income to investors.

- All or part of the fees and expenses may be charged to the capital of the Fund rather than being deducted from income. Future capital growth may be constrained as a result of this.

A more detailed description of the risks that apply to this Fund can be found in the Fund's prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses for the year ending 31/01/2021. *From 30 April 2021, the Ongoing Charge calculation has been extended to include, where relevant, charges incurred by closed-ended vehicles such as investment trusts. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units in another collective investment undertaking.

For more information about charges, please see Section 21 - 23 of the Fund's Prospectus, which is available at www.marlbroughfunds.com.
